

ATTENTION TEACHERS

Did you know the Lawrence-Scioto County Solid Waste Management District offers classroom presentations to your students regarding important topics such as the importance of *Recycling & Litter Prevention*. To schedule a presentation for your class just give us a call at (740) 532-1231. The presentations last approximately 45 minutes per group; they are fun, interactive, informative & educational!

We can also assist in the implementation of a school recycling program if one is not currently in place, we take the guess work out of starting a new program & tell you how simple it can be & what works for other schools in your County.

Be sure to check out our website at

www.lsswmd.org

We look forward to hearing back from you, and are here to assist you along the way!
